Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 5 is objected to because of the following informalities:

Claim 5, line 5, there is an inadvertent period at the end of the line.

Appropriate correction is required.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 15-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The "data packet" by itself lacks a statutory category --process, machine, manufacture or composition of matter. See MPEP 2106 IV.8.1.(a) Functional Descriptive Material: "Data Structures" Representing Descriptive Material Per Se or Computer Programs Representing Computer Listings Per Se.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 5-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Kano et al. (US 6,310,858 B1).

Art Unit: 2662

Kano teaches a frame relay system, wherein a frame is equivalent to a packet (See Figure 1). With respect to the claims below, references to the prior art appear in parenthesis.

5. *A method of routing a plurality of data packets in a network (Kano, Figure 10), comprising:*

receiving a data packet of the plurality having a destination (Box S1);

determining a route for the data packet based on the destination (Boxes S2 and S3);

determining a first time-to-live value set for the data packet (Box S8);

modifying the first time-to-live value to form a second time-to-live value (Box S9).

forwarding the data packet along the route based on the second time-to-live value (Box S10).

6. *The method according to claim 5, wherein forwarding the data packet comprises:*

forwarding the data packet toward the destination, when the second time-to-live value is greater than 0 (Column 2, lines 26-37).

7. *The method according to claim 5, wherein forwarding the data packet comprises:*

discarding the data packet, when the second time-to-live value is 0 (Column 2, lines 26-37).

Allowable Subject Matter

5. Claims 1-4, 8-14 and 22-25 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to anticipate or make obvious the lifetime of the data packet based on the route to the packet destination.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Marcelo whose telephone number is 571-272-3125. The examiner can normally be reached on Mon-Fri 8:30-5:00.
